TUGAS PENDAHULUAN MODUL 01

A. SOAL

1 **Instalasi Flutter & Android Studio**

Lakukan instalasi **Flutter** dan **Android Studio** pada **device** Anda dengan mengikuti panduan yang ada pada **Modul 1.**

a. **Screenshot** tahapan melakukan instalasi.
b. **Screenshot** hasil **flutter doctor.**

2 **Menambahkan Virtual Device**

Buka **Android Studio.**

a. Pada tampilan awal pilih opsi **More Action**, lalu pilih opsi **Virtual Device Manager**.
b. Pada bagian kiri atas, pilih opsi **Create a Virtual Device**.
c. Pilih **Device** yang ingin anda gunakan dan download.
d. **Screenshot** tampilan **virtual device** yang berhasil di jalankan.

3 **Membuat Project Flutter**

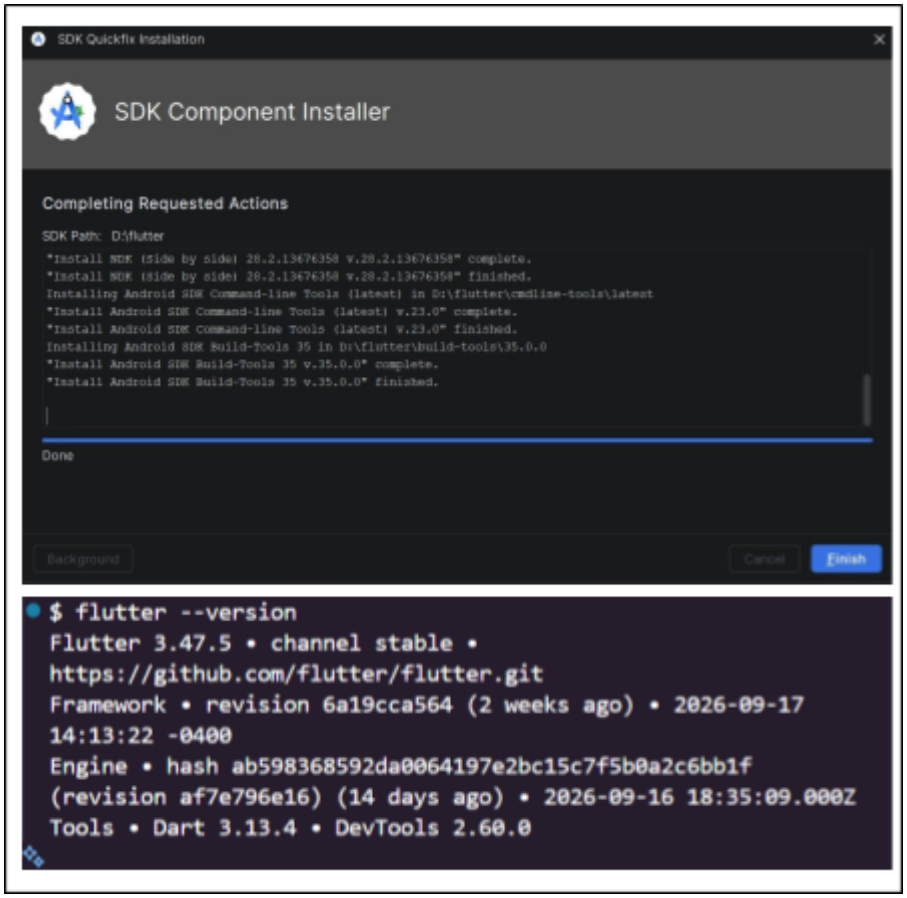

Buka **Visual Studio Code**.

a. Buat project **Flutter** baru, dan jalankan.
b. **Screenshot** tampilan **hasil run** menggunakan **Virtual Device** yang sebelumnya telah terdownload beserta **code**-nya.

B. JAWABAN

1. Instalasi Flutter dan Android Studio

a. Screenshot tahapan melakukan instalasi

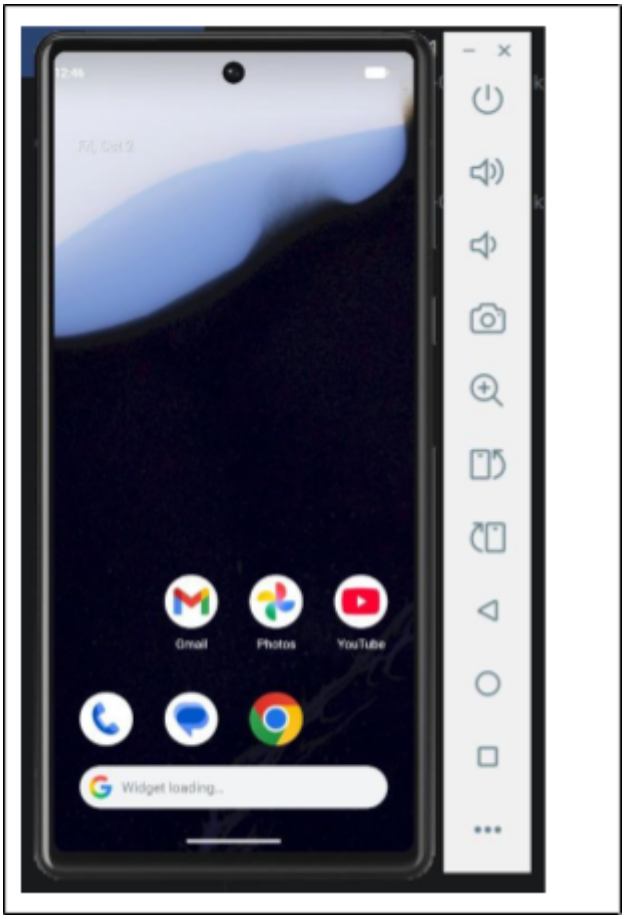

b. Screenshot hasil flutter doctor

```
D:\>flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[√] Flutter (Channel stable, 3.47.5, on Microsoft Windows [Version 10.0.26200.9457], locale en-US)
[√] Windows Version (Windows 11 or higher, 25H2, 2009)
[√] Android toolchain - develop for Android devices (Android SDK version 36.0.0)
[√] Chrome - develop for the web
[X] Visual Studio - develop Windows apps
    X Visual Studio not installed; this is necessary to develop Windows apps.
      Download at https://visualstudio.microsoft.com/downloads/.
      Please install the "Desktop development with C++" workload, including all of its default components
[√] Connected device (3 available)
[√] Network resources

! Doctor found issues in 1 category.
```

2. **Menambahkan Virtual device**

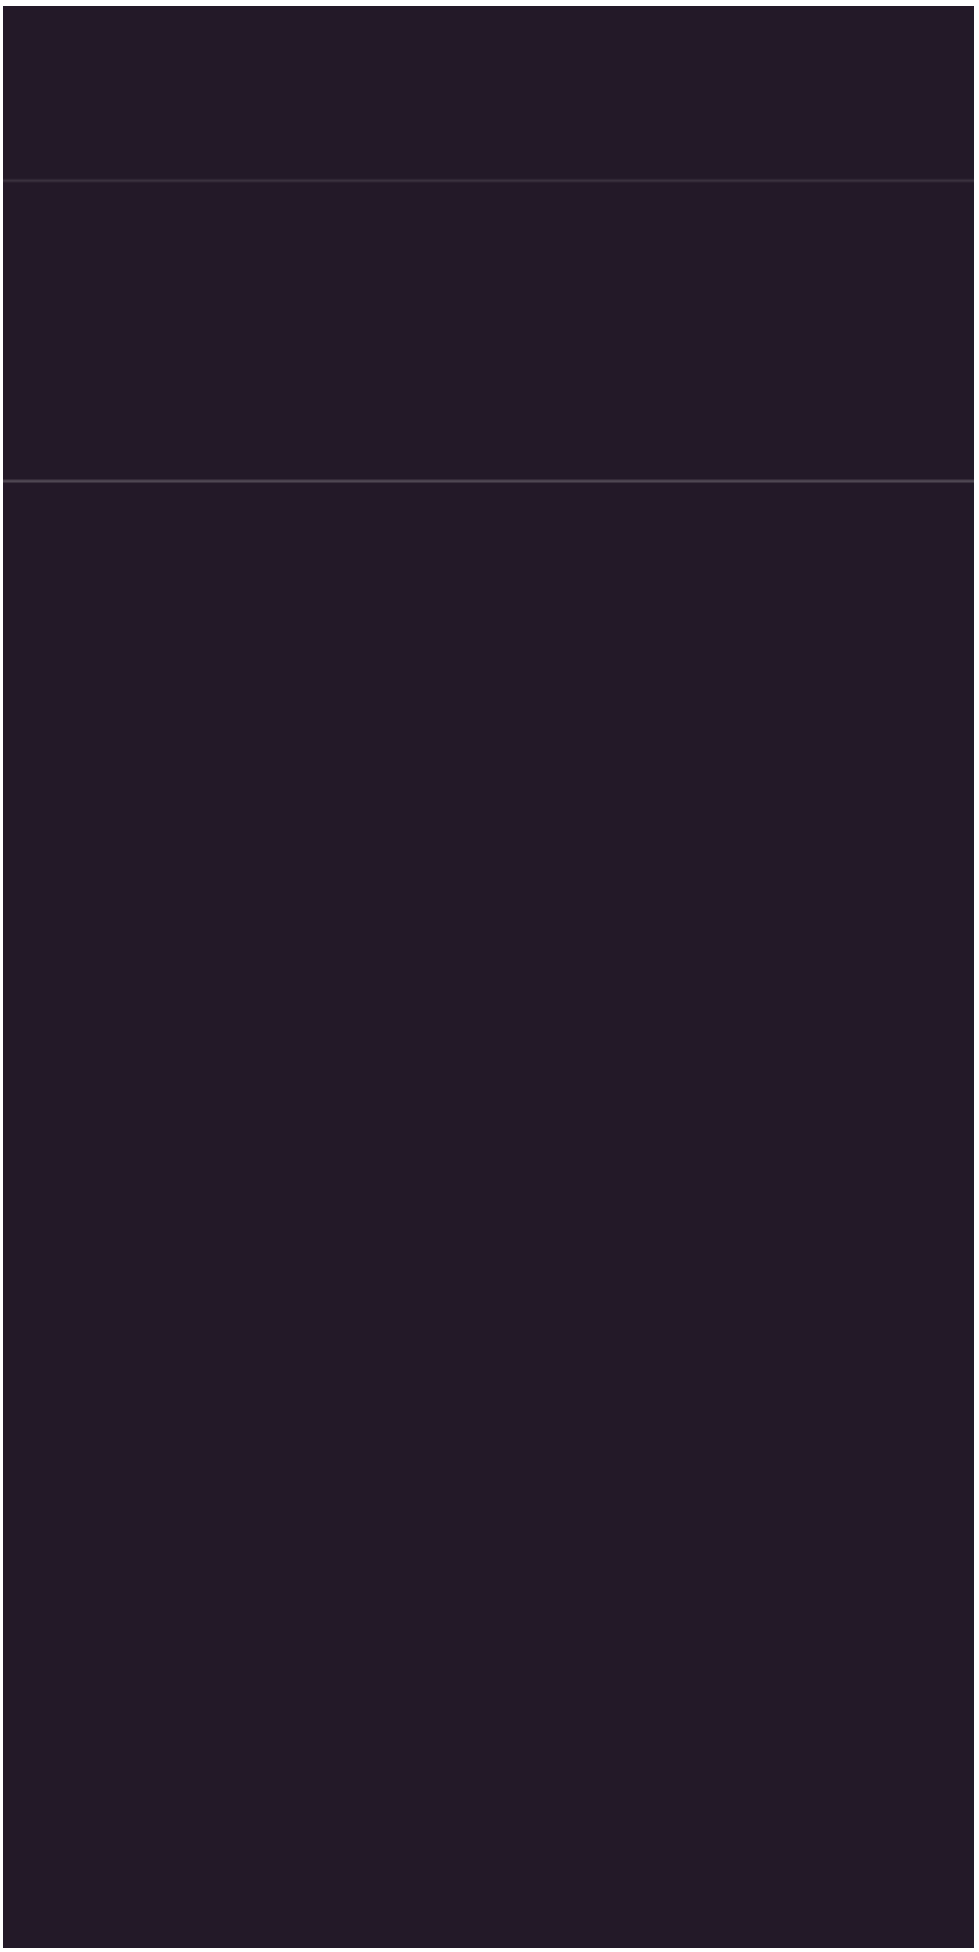

3. **Membuat project**

Flutter Source code

```dart
import 'package:flutter/material.dart';

void main() {
  runApp(const MyApp());
}

class MyApp extends StatelessWidget {
  const MyApp({super.key});
```

```dart
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      debugShowCheckedModeBanner: false,
      title: 'Hello World App',
      theme: ThemeData(
        colorScheme: ColorScheme.fromSeed(
          seedColor: Colors.deepPurple,
        ),
        useMaterial3: true,
      ),
      home: const MyHomePage(),
    );
  }
}

class MyHomePage extends StatefulWidget {
  const MyHomePage({super.key});

  @override
  State<MyHomePage> createState() => _MyHomePageState();
}

class _MyHomePageState extends State<MyHomePage> {
  String message = 'Hello World!';

  void changeMessage() {
    setState(() {
      message = 'Selamat datang di Flutter! 🎉';
    });
  }

  @override
  Widget build(BuildContext context) {
    return Scaffold(
```

```
              Icons.flutter_dash,
              size: 100,
              color: Colors.blue,
            ),

            const SizedBox(height: 20),

            Text(
              message,
              style: const TextStyle(
                fontSize: 28,
                fontWeight: FontWeight.bold,
              ),
            ),
            const SizedBox(height: 10),
            const Text(
              'Ini adalah aplikasi Flutter pertamaku.',
              style: TextStyle(
                fontSize: 16,
              ),
            ),

            const SizedBox(height: 30),

            ElevatedButton(
              onPressed: changeMessage,
              child: const Text('Klik Saya'),
            ),
          ],
        ),
      ),
    );
  }
}
```

Screenshot Output

Deskripsi Program

Project ini merupakan aplikasi sederhana berbasis Flutter yang menampilkan halaman Hello World. Aplikasi memiliki AppBar, ikon Flutter, teks sapaan, deskripsi singkat, dan tombol interaktif. Ketika tombol “Klik Saya” ditekan, teks pada halaman akan berubah menggunakan fungsi setState(). Project ini dibuat untuk memahami dasar penggunaan widget seperti Scaffold, Column, Text, Icon, dan ElevatedButton. Selain itu, project ini menjadi latihan awal dalam memahami konsep antarmuka dan interaksi pengguna pada aplikasi Flutter.
